

Financials & Events

The majority of resources go directly to patient care, supporting medical visits, counseling, medications, and care coordination. In the past year, Hope Clinic hosted events like the Cookout, which welcomed over 150 attendees, the Golf Outing, which sold out and raised over \$25,000, and the Decades Event, which raised \$28,000. These gatherings bring people together to support this work and increase awareness across the region. They are made possible through community partnerships, sponsors, and volunteers who help carry the work forward. We're grateful for everyone who participated and contributed, and we hope you'll join us again in the year ahead!

2026 Events

Open House & Cookout
JUNE 5

Golf Outing
JULY 23

Annual Fundraiser
NOVEMBER 7

Cookies & Community

We were blessed with a partnership with Chick-fil-A Appleton on a campaign that turned Chocolate Chunk Cookie sales into direct support for patient care, raising over \$1,000. Owner and Operator Eric Krebs also nominated Hope Clinic for the Chick-fil-A True Inspiration Award, followed by a community-wide voting effort in September for a facilities update grant of \$30,000. Eric and team have also supported our work for many years by providing meals for participants at Hope Clinic's annual Golf Outing.

Partnerships like this are a meaningful way for local businesses to invest in the health of the community. We're grateful for the support and engagement of partners like Chick-fil-A of Appleton. If you're interested in partnering with Hope Clinic, we welcome the conversation. Please contact Executive Director David Lally at dlally@hopeclinic.care.

CONNECT WITH US

If you're looking for a way to get involved, we welcome you to volunteer, partner with us, or support this work through a gift.

Our Impact at HOPE

Hope Clinic serves uninsured neighbors across Outagamie, Calumet, and northern Winnebago Counties. Many are managing health concerns alongside financial pressure, language barriers, or limited access to consistent care. In 2025, Hope Clinic provided care for over 600 patients across medical and counseling appointments. Each and every visit reflects time, attention, and a relationship built over time.

Care at Hope Clinic centers on long-term relationships, education, and helping patients take an active role in their health.

The Power of an Hour

In many healthcare settings, visits last under 25 minutes. At Hope Clinic, every new patient receives a full 60-minute appointment. That time changes what care looks like.

Providers are able to understand the full picture. Health concerns, daily stress, access to food, stable housing, and the challenges patients are carrying all have space in the conversation. Mental health needs are easier to recognize. Follow-up care becomes more consistent.

There is also space to listen, connect, pray.

Patients share what is weighing on them. Trust begins to build. In many visits, time is set aside for prayer and encouragement.

Patients leave with a plan, but also with a sense that they were heard and truly cared for.

That hour reflects a simple belief: people deserve time and attention when it comes to their health.

How Care Happens

CARE NAVIGATION & CARE MANAGEMENT

Support that extends beyond medical care. Staff help patients navigate housing, food access, employment, transportation, and other barriers that affect health.

COUNSELING

Mental health services for patients of all ages, offered in person and through telehealth. Sessions focus on practical tools, emotional support, and consistent follow-up.

HEALTHCARE

Primary care, medications, labs, and specialty referrals. Providers work with patients to manage chronic conditions and address concerns early.

Telehealth Expands Access

In the second half of 2025, Hope Clinic launched TeleTalk services as part of a statewide network of 14 clinics. Hope Clinic serves as a Host Site, providing behavioral health services across the network.

Telehealth makes it easier for patients to stay connected to care. Appointments can fit around work schedules, childcare, and transportation challenges. Patients are able to access support earlier and avoid gaps in care.

As a Host Site, Hope Clinic helps extend access to behavioral health services across Wisconsin, including bilingual care. This model allows clinics to work together so patients can connect with the care they need without long delays.

What Care Looks Like for Patients

A patient arrived early for a counseling visit, visibly overwhelmed. Staff provided a quiet space, water, and support until the counselor arrived. The patient was able to stay, talk, and begin working through what they were facing.

Another patient, nervous about seeking care and unsure how to communicate in English, was greeted in Spanish at the front desk. That moment changed the visit. The patient was able to explain their needs and continue care with confidence.

A patient managing high blood pressure shared stress related to unemployment. During the visit, staff helped connect them with a local employer while also working through practical strategies for managing stress and improving health. What we hear from patients confirms for us that what we're doing and how we're carrying it out every day- this practical support, clear communication, and making space where patients feel at ease- truly matters.

“I’ve learned to pause before I react instead of reacting right away.”

“Everyone is so welcoming. I feel comfortable here.”
